

*1st International Workshop
on Neuroimmunology
April 2008, Varadero, Cuba*

Dear colleagues,

It is our pleasure to invite you to attend the 1st International Workshop on Neuroimmunology where we have planned to walk from the molecular mechanism involving neurodegenerative process to the therapeutic interventions. The program will include Master Lectures, Interactive Workshops on relevant methods of research in this field and a Discussion session on the most current aspects of neuroimmunology and neuroscience, in addition to short oral presentations and poster sessions.

The 1st International Workshop on Neuroimmunology, organized by the Neuroimmunology Section of the Cuban Immunology Society, will be held on April 19 to 22, 2008 in Club Amigo Hotel, at Varadero beach, Cuba, during "Immunopharmacology 2008", a meeting of the Cuban Pharmacology Society.

Besides the neurological diseases included, Multiple Sclerosis, Optic Neuromyelitis, Parkinson disease, Alzheimer disease, Huntington Disease, Ataxias, Epilepsy and infections in childhood into others topics, we have also planned a discussion section on demyelinating diseases on the most current topics in this field.

For these reasons, we would appreciate the attendance of very experienced speakers, PhD students and neuroscientists in general from other countries, which would enrich the exchange and the possibility of new collaborative projects between our Universities and Research Institutes.

Looking forward to seeing you join us in April 2008

*Sincerely yours
Maria Robinson, MD
President*
